Benefits of Attending

The higher you climb on the corporate ladder, the more financial information you are expected to interpret and utilize when making business decisions, no matter you are in sales, marketing, operations or human resources. If you are the manager of a group or division, chances are you are responsible for creating value in your area and reporting it to others in financial terms. Managers who have excellent “people” skills still need to enhance their “financial” skills in order to be well-rounded and effective. Understanding financial analysis, reporting, and decision making does not require a degree in business economics - all you need to know are the basics.

As a result of attending this program, you will be able to:

- Communicate more effectively with financial executives in your organization
- Better understand how economic outcomes of business decisions are reflected in your organization’s financial reports
- Improve your “financial” vocabulary so that you are better able to read and interpret financial statements
- Better understand the competitive environment faced by the firm
- Develop guidelines to measure success in financial terms
- Enhance your ability to use financial analysis in your decision making
- Prepare budgets that are an accurate reflection of your area’s financial success
- Utilize forecasting techniques and learn how to determine their accuracy

By attending this program, you will receive 1 credit towards our Distinguished Leader Certification and will personally be rewarded with Life-time Scholarship and Peers Vouchers to develop your chosen peer. Visit our website for more details: <http://www.michiganexecutiveeducationasia.com/distinguished-leader/>
