MICHIGAN ROSS

ROSS MBAn PREREQUISITE ASSESSMENT FORM

Thank you for your interest in the Ross MBAn Program. Please provide the following information to have non University of Michigan courses assessed for prerequisite satisfaction. Courses may be complete, in progress or intended at the time of submission. Please provide a link to your school's underlinepublic course catalog in the "Course Web Link" field to confirm course description.

For a course to meet our prerequisite requirements:
- Be completed in-person or online at any degree-granting, accredited (or government recognized) community college or 4-year university.
- Have earned college credit and a grade of "C" or better.
- Cover coding concepts of Python and/or R inclusive of variables, conditionals, loops, functions, list comprehensions, and lambda expressions.
- Please send this completed document along with an unofficial transcript and course syllabus.

For your reference and comparison, here are some examples of current courses at the University of Michigan that meet the prerequisite course requirement:
EECS 183 - Elementary Programming Concepts
EECS 280 - Programming and Introductory Data Structures
SI 106/ALA 118 - Programs, Information and People
SI 206 - Data-Oriented Programming
TO 420- Introduction to Coding with Python
