Accounting

Reuven Lehavy // AREA CHAIR
Victor L. Bernard-PricewaterhouseCoopers LLP
Colleague Professor of Accounting
Informativeness and usefulness of financial analysts’ price targets, stock recommendations, and earnings forecasts; firms’ use of accounting report discretion (earnings management); and the interaction between analysts’ earnings forecasts targets and firms’ reporting choices.

Ryan T. Ball
Assistant Professor of Accounting
The role of low frequency accounting information in high frequency capital markets, mixed data sampling (MIDAS), accrual dynamics, earnings timeliness and forecasting, and the debt contracting value of accounting information.

Anna Costello
Paton and Drebin Faculty Fellow
Assistant Professor of Accounting
The role of information in inter-firm relationships, specifically how financial information aids in making trade credit decisions in the supply chain, and the influence of trade relationships on contagion and counterparty risk.

Lindsey Gallo
Coopers and Lybrand, Norman E. Auerbach
Assistant Professor of Accounting
The role of disagreement and uncertainty in capital markets, the information content of earnings, and the relationship between firm-level and macroeconomic information.

Raffi Indjejikian
Carleton H. Griffin-Deloitte and Touche LLP Collegiate Professor of Accounting
Professor of Accounting
Use of managerial and financial accounting information in performance evaluation and managerial compensation, and agency theory and its application to managerial accounting.

Mihir Mehta
Assistant Professor of Accounting
The implications of financial information transfers along supply chains, the consequences of legal and political factors for firms and auditors, and debt contracting.

Gregory (Greg) S. Miller
Ernst and Young Professor of Accounting
Professor of Accounting
Director, Paton Center for Research in Accounting
Financial communication, how managers communicate their view of the firm and its activities to outsiders.

Venky Nagar
KPMG Professor of Accounting
Teitelbaum Research Scholar
Professor of Accounting
Interaction among firm strategy, organizational design and managerial accounting, and use of non-financial measures in performance evaluation.

Catherine (Cathy) Shakespeare
Michael and Joan Sakkinen Faculty Fellow
Associate Professor of Accounting
Director, MAcc Program
Financial accounting and reporting, measurement and financial instruments, the timeliness and accuracy of bond ratings, examination of managers’ incentives to use discretion in reporting earnings, and evaluation of the role of accounting information in firm valuation.

Christopher (Chris) Williams
Associate Professor of Accounting
Understanding the role of accounting information in creating and resolving risk and uncertainty in both capital markets and financial institutions; how discretionary accounting choices made by banks affects both the risk of the individual bank and the bank’s contribution to systemic risk.

David (Dave) W. Wright
Associate Professor of Accounting
Auditing and financial reporting; investigations into the roles of various legal, corporate governance and business relationship characteristics on the quality of financial reporting and auditing; and economic models of auditor and firm behavior.
Business & Economics

Thomas (Tom) Buchmueller //
Waldo O. Hildebrand Professor of Risk Management and Insurance
Professor of Business Economics and Public Policy
Health economics, the demand for insurance, employer-sponsored insurance and the labor market, regulation of insurance markets, and public insurance programs.

Thomas (Tom) P. Lyon //
Dow Professor of Sustainable Science, Technology, and Commerce
Professor of Business Economics and Public Policy
Professor of Natural Resources and Environment
Corporate environmental information disclosure, greenwash, the causes and consequences of renewable energy policy, and voluntary programs for environmental improvement.

Achyuta Adhvaryu
Assistant Professor of Business Economics and Public Policy
Firm decision-making and the resulting productivity dynamics in emerging markets, healthcare delivery in low-income contexts, and the long-run economic impacts of early life events.

Kyle Handley
Sanford R. Robertson Assistant Professor of Business Administration
Assistant Professor of Business Economics and Public Policy
International trade and trade policy, investment under uncertainty, firm dynamics, multinational firms, private equity, effects of multilateral and regional trade agreements, and economic geography.

Francine Lafontaine
Senior Associate Dean for Faculty and Research
William Davidson Professor of Business Administration
Professor of Business Economics and Public Policy
Professor of Economics, LSA
Industrial organization, vertical relationships and antitrust, contracting and franchising, and entrepreneurship. My research applies advances in contract theory and models of vertical relationships to the analysis of franchising arrangements and other contractual relationships with an emphasis on incentive issues, firm performance, and competition policy. I also study industry and firm dynamics (entry, exit, growth) in retail and service industries.

Scott E. Masten
Professor of Business Economics and Public Policy
Economics of organization, transaction-cost economics, contracting practices and contract law, theory of the firm, vertical integration and vertical restrictions, and evolution of legal institutions.

Sarah Miller
Assistant Professor of Business Economics and Public Policy
Health economics, public policy, healthcare, public economics, consumer credit, and personal finance.

Joel Slemrod
Paul W. McCracken Professor of Business Economics
Professor of Business Economics and Public Policy
Professor of Economics, LSA
Director, Office of Tax Policy Research
Impact of tax policy on individual and business decisions, compliance costs of taxation, roles of businesses and technology in tax system operation, and tax policy.

Jagadeesh Sivadasan
Associate Professor of Business Economics
Director, Full-Time MBA Program
Allocative efficiency, firm performance and productivity, international economics, personnel economics, product market competition, and public policy and firm behavior.
Finance

Uday Rajan // AREA CHAIR
Jack D. Sparks-Whirlpool Corporation
Research Professor of Business Administration
Professor of Finance
Informational frictions such as adverse selection and moral hazard and their effect on market transactions, with recent work on the role of the board in the presence of activist investors and on the default behavior of subprime mortgages in the years before the financial crisis.

Sugato Bhattacharyya
Associate Professor of Finance
Corporate finance, information economics, and contractual arrangements.

David J. Brophy
Professor of Finance
Director, Office for the Study of Private Equity Finance
Venture capital finance and investment, predictive analytics using initial public offering market characteristics and comparison of returns in public and private alternative investment spaces, global flows of public and private capital, and the role of private equity in cross-border direct and portfolio investment.

Robert F. Dittmar
Professor of Finance
Asset pricing, macroeconomic variables and asset prices, investments, and fixed income securities.

Gautam Kaul
Fred M. Taylor Professor of Business Administration
Professor of Finance
Finance and sustainability, asset pricing models, market microstructure, and the behavior of stock and bond prices.

E. Han (Han) Kim
Everett E. Berg Professor of Business Administration
Professor of Finance and International Business
Director, Mitsui Life Financial Research Center and East Asia Management Development Center
Corporate governance and the interplay between the three main governing bodies; the board of directors, the CEO office, labor and finance, law and finance, equity issuance, and employees.

Serhiy Kozak
Assistant Professor of Finance
Empirical and theoretical asset pricing, risk premia across asset classes, fixed income, financial economics, and computational economics.

Indrajit Mitra
Assistant Professor of Finance
Theoretical and empirical topics in finance and macro-economics, analyzing distortions induced by financial frictions, with an interest in effects generated by heterogeneity both on the household and the firm side, and in developing methodologies to solve such models quantitatively.

Stefan Nagel
Michael Stark Professor of Finance
Professor of Finance
Professor of Economics, LSA
Empirical asset pricing, financial market liquidity, subjective beliefs and preferences in finance and macroeconomics.

M.P. Narayanan
Robert Morrison Hoffer Professor of Business Administration
Professor of Finance
Contract theory, asymmetric information, and their application to corporate finance and investments; capital structure, takeover financing, and divestitures; managerial myopia; managerial incentives; and corporate governance.
Paolo Pasquariello
Associate Professor of Finance
Information economics and applications to market microstructure (e.g., market liquidity and price efficiency) and international finance (e.g., foreign exchange, financial crises and contagion, and central bank interventions).

Isacco Piccioni
Assistant Professor of Finance
Asset pricing, decision theory, portfolio theory, risk management, finance-liquidity, finance-downside risk, and behavioral.

Amiyatosh Purnanandam
Professor of Finance
Security issuance (IPOs/SEO) decisions, capital structure and risk-management decisions, banking, corporate risk management and credit risk, initial public offerings and seasoned equity offerings, and theoretical corporate finance.

Martin C. Schmalz
Jones Research Scholar
Assistant Professor of Finance
Empirical and theoretical topics in industrial organization, corporate finance, behavioral finance, asset pricing, and financial economics.

H. Nejat (Nejat) Seyhun
Jerome B. and Eilene M. York Professor of Business Administration
Professor of Finance
Executive compensation, information effects of short-selling, empirical asset pricing, insider trading, and law and economics.

Tyler Shumway
Professor of Finance
Co-Director, John R. and Georgene M. Tazzi Electronic Business and Finance Center
Market efficiency and behavioral finance, asset pricing theory and models, forecasting defaults and bankruptcies, empirical options pricing, survey measures to explain portfolio choice, and econometrics.

Cindy K. Soo
Assistant Professor of Finance
Behavioral finance, real estate finance, financial media, household finance, and applied econometrics.

Denis Sosyura
Assistant Professor of Finance
Empirical corporate finance, political economy and regulation, and financial media.

Toni Whited
Dale L. Dykema Professor of Business Administration
Professor of Finance
The effects of financial frictions on corporate investment, econometric solutions for measurement error, corporate cash policy, structural estimation of dynamic models, and corporate diversification.

Stefan Zeume
Assistant Professor of Finance
The impact of anti-bribery regulation on regulated firms’ competitiveness, value of having subsidiaries in tax havens, and family firms’ use of implicit contracts as a substitute for labor market regulation.
Management & Organizations

Susan (Sue) J. Ashford // AREA CHAIR
Michael and Susan Jandernoa Professor of Business Administration
Professor of Management and Organizations
Leadership and managerial effectiveness, issue selling, self-management, and organizational change. I study this work in the context of interpersonal relations, organizational change, and employee socialization.

Wayne Baker
Robert P. Thorne Professor of Business Administration
Professor of Management and Organizations
Professor of Sociology, LSA
Professor of Organizational Studies, LSA
Faculty Associate, Institute for Social Research
Social capital, networks, organizational theory, culture, values, positive organizational scholarship, and economic sociology.

Kim Cameron
William Russell Kelly Professor of Business Administration
Professor of Management and Organizations
Professor of Education, School of Education
Positive organizational scholarship; virtuousness in organizations, such as forgiveness, gratitude, kindness, and compassion and their relationship to performance; downsizing; organizational culture; and developing leadership and management skills.

Gerald (Jerry) Davis
Wilbur K. Pierpont Collegiate Professor of Management
Professor of Management and Organizations
Professor of Sociology, LSA
Finance and society, corporate governance, organization theory, globalization, social networks, and social movements.

Alison Davis-Blake
Leon Festinger Collegiate Professor of Management
Professor of Management and Organizations
Effects of outsourcing on organizations and employees; organizational employment, salary, and promotion systems; and the determinants and consequences of using contingent workers.

Scott DeRue
Edward J. Frey Dean of Business
Stephen M. Ross Professor of Business
Leadership, team, and organizational development; individual and organizational learning; strategic execution and implementation; HR/talent strategy; and personal growth and development.

Jane E. Dutton
Robert L. Kahn Distinguished University Professor of Business Administration and Psychology
Professor of Management and Organizations
Professor of Psychology, LSA
Positive relationships and identities at work; employee and organizational flourishing; compassion and organizations; job crafting and employee resourcefulness; and positive organizational scholarship.

Andrew (Andy) J. Hoffman
Holcim (US) Inc. Professor of Sustainable Enterprise
Professor of Management and Organizations
Professor of Natural Resources and Environment
Institutional theory, culture change, social movements, negotiations, organizational and social entrepreneurship, environmental protection, and sustainability of industries.

David (Dave) M. Mayer
Michael R. and Mary Kay Hallman Fellow
Associate Professor of Management and Organizations
Social and ethical issues in organizations. Specifically, research in three major areas — behavioral ethics, organizational justice, and workplace diversity.

Robert (Bob) E. Quinn
Margaret Elliot Tracy Collegiate Professor of Business Administration
Professor of Management and Organizations
Positive organizational scholarship, organization effectiveness, organizational change, leadership and managerial effectiveness, and high-performance behavior.
Jeffrey Sanchez-Burks  
Professor of Management and Organizations  
Director, Office of Action-Based Learning  
Design thinking, innovation, cross-cultural collaborations, emotional aperture, emotional intelligence, and leading organizational change.

Lloyd E. Sandelands  
Professor of Management and Organizations  
Professor of Psychology, LSA  
Business ethics, Thomist metaphysics, business applications of Catholic social teaching.

Gretchen Spreitzer  
Keith E. and Valerie J. Alessi Professor of Business Administration  
Professor of Management and Organizations  
Director, Center for Positive Organizations  
Thriving at work, employee empowerment, leadership, organizational change, and positive organizational scholarship.

Maxim Sytch  
Michael R. and Mary Kay Hallman Fellow  
Associate Professor of Management and Organizations  
Organization theory, complex systems, economic sociology, collaboration, conflict, networks, strategic alliances, patent infringement lawsuits, intellectual property, and innovation.

Noel M. Tichy  
Professor of Management and Organizations  
Strategic human resource management; transformational leadership; organizational change and career development; organizational structure and design; leadership best practices in healthcare; and global citizenship.

Jose Uribe  
Assistant Professor of Management and Organizations  
The impact of network structures and social dynamics on learning and performance in teams and organizations; investigating the demographic determinants of having female top managers in public corporations; the learning networks that enable equity analysts to improve their financial forecasts; and the collaboration networks between players that provide a competitive edge to professional national soccer teams.

James (Jim) Walsh  
Arthur F. Thurnau Professor  
Gerald and Esther Carey Professor of Business Administration  
Professor of Management and Organizations  
Professor of Strategy  
Corporation in society, corporate social responsibility, and corporate governance.
**Marketing**

**David B. Wooten**  //  **AREA CHAIR**  
*Alfred L. Edwards Collegiate Professor*  
*Director, Diversity and Inclusion Initiatives*  
*Professor of Marketing*  
Consumer culture theory, self-presentation, shopping behavior, and consumer socialization.

**Anocha Aribarg**  
*Michael R. and Mary Kay Hallman Faculty Fellow*  
*Associate Professor of Marketing*  
Group decision-making; social influence in choice decisions and impact of social network; Bayesian and econometric modeling of complex consumer choice decisions and consumption experiences; and psychology-based market response modeling.

**Richard (Rick) P. Bagozzi**  
*Dwight F. Benton Professor of Marketing*  
*Professor of Marketing*  
Emotions, decision-making, theory of mind and social behavior in marketing and organizations; brand communities; health behaviors; cross-cultural research; ethical behavior; neuroscience, genetic, and hormonal aspects of the behavior of consumers and managers; and statistics.

**Rajeev Batra**  
*Sebastian S. Kresge Professor of Marketing*  
*Professor of Marketing*  
Advertising budgeting and repetition, emotion in advertising, non-verbal processes and effects, brand personality and brand equity, brand building and brand management, global branding issues, global consumer culture, and marketing issues in emerging economies.

**Katherine Burson**  
*Associate Professor of Marketing*  
Judgment and decision-making in consumer behavior, systematic biases in self-assessment, self-other bias differences, and biases in response to numbers.

**Fred Feinberg**  
*Joseph Handlerman Professor of Marketing*  
*Professor of Statistics*  
Modeling choice behavior; dynamic models of advertising, promotion, and variety-seeking; optimal stopping and cutoffs; decision theory, statistics, and Bayesian econometrics; and the interface between marketing, operations management, and engineering.

**Richard (Rich) D. Gonzalez**  
*Professor of Psychology, LSA*  
*Professor of Statistics, LSA*  
*Professor of Marketing*  
Models of choice, judgment and decision making, development of new statistical models for social science data, social interaction in teams and groups, well-being through the lifespan, and the development of new analytic models for combining social science and biological (e.g., brain imaging, genetics).

**Thomas (Tom) C. Kinnear**  
*D. Maynard Phelps Collegiate Professor of Business Administration*  
*Professor of Marketing*  
Application of marketing to the commercialization of high technology; and the formation, success, and failure of entrepreneurial enterprises.

**Aradhna Krishna**  
*Dwight F. Benton Professor of Marketing*  
*Professor of Marketing*  
Sensory perception, social marketing, language perception, pricing and promotion, and mechanism design.
Puneet Manchanda
Isadore and Leon Winkleman Professor of Retail Marketing
Professor of Marketing
Big data, response models, resource allocation, advertising, new product adoption, social networks, models of firm behavior, Bayesian econometrics, empirical industrial organization, statistics, and discrete choice models.

Yesim Orhun
Assistant Professor of Marketing
Empirical industrial organization, product competition, retail competition, behavioral and experimental economics, belief formation, belief utility, information demand, and reciprocity.

Venkatram Ramaswamy
Professor of Marketing
Consumers as co-creators of value, customer-firm interactions, consumer heterogeneity and personalized experiences, market as a forum, experience innovation, experience networks, information infrastructure, consumer-to-consumer interactions, consumer communities, word-of-mouth, and discursive theory of the market.

Scott Rick
Assistant Professor of Marketing
Financial decision-making, shopping, intertemporal choice, loss aversion, emotion and decision-making, and behavioral economics.

Eric Schwartz
Assistant Professor of Marketing
Interactive marketing, e-commerce, retailing, online advertising, digital media consumption, customer relationship management, Bayesian econometrics and statistics, adaptive experiments, multi-armed bandit problems, and machine learning.

Srinivasaraghavan Sriram
Associate Professor of Marketing
Two-sided markets, product portfolio management, brand equity, consumer adoption of technology products, consumer learning, long-term effects of marketing actions, optimal allocation of marketing budgets, empirical industrial organization models, strategic interactions between firms, and brand equity.

J. Frank (Frank) Yates
Professor of Psychology, LSA
Professor of Marketing
Decision management and aiding; consumer behavior; risk perception, probability judgment processes, accuracy, and improvement; cultural variations in judgment and decision behavior; individual differences in decision making; indecision; assessing and explaining decision-making skills.

Carolyn Yoon
Professor of Marketing
Consumer neuroscience, decision neuroscience, cultural neuroscience, cognitive aging in consumer contexts, implicit memory for consumer information, and cross-cultural differences in memory and cognition.
Strategy

James (Jim) Westphal // AREA CHAIR
Robert G. Rodkey Collegiate Professor of Business Administration
Professor of Strategy
Strategic management and organizational theory, with a focus on social and psychological processes in corporate governance and strategic decision-making.

Allan Afuah
Professor of Strategy
Business model innovation; crowdsourcing; multi-sided platforms; open innovation; value creation and capture in the face of technological innovation; and wealth creation in developing countries.

Gautam Ahuja
Harvey C. Fruehauf Professor of Business Administration
Professor of Strategy
Director, India Initiatives
Innovation and technology strategy; alliances, joint ventures, and acquisitions; inter-organizational networks, corporate R&D investments, and how firms exploit technologies to create and appropriate value.

Seth Carnahan
Assistant Professor of Strategy
Connection between labor markets and firm performance, employee mobility, entrepreneurship, and compensation and incentives.

Felipe Csaszar
Associate Professor of Strategy
How structure and organization design affect strategic-level outcomes such as innovation, speed, and profits.

Derek Harmon
Assistant Professor of Strategy
Strategic communication, financial markets, managing relationships with stakeholders, reputation, legitimacy, and trust.

Michael Jensen
Associate Professor of Strategy
The socio-cognitive structures of markets including social networks and market identities and how they affect competition.

Aneel G. Karnani
Professor of Strategy
Competitive advantage, growth strategies, global competition, emerging economies, corporate social responsibility, economic development, and global poverty.

Amy Nguyen-Chyung
Assistant Professor of Strategy
Entrepreneurship, entrepreneurial firms, entry decisions, non-market strategy, and global strategy.

Linda Y.C. Lim
Professor of Strategy
Foreign direct investment, multinational strategies, labor issues and economic development in Asia, evolution of Asian business systems, government-business and state-society relations.

James Ostler
Assistant Professor of Strategy
Strategic risk-taking, entrepreneurship, diffusion of scientific discovery and innovation, capturing value from innovations, behavioral game theory and how cultural and cognitive dimensions impact coordination within and across firms.

Jordan Siegel
Michael R. and Mary Kay Hallman Fellow
Associate Professor of Strategy
How firms can borrow foreign institutions as a means of substituting for weak governance institutions at home, how labor market institutions impact the design and success of global business strategies, and on how culture impacts the decision of where to locate foreign direct investments.
Marina Whitman  
*Professor of Business Administration and Public Policy*  
International trade and investment, trade policy and labor-market adjustment, changing role of U.S. multinational corporations, global corporate social responsibility, and the question of global convergence toward a common model of capitalism.

Brian Wu  
*Associate Professor of Strategy  
Director, China Global Node*  
Corporate scope, industry dynamics, firm capabilities, entrepreneurship, innovation, and the Chinese economy.

Yue Maggie Zhou  
*Assistant Professor of Strategy*  
Theory of the firm, product variety, organization structure, coordination, complexity, and multinational corporations.
Technology & Operations

Roman Kapuscinski // AREA CHAIR
John Psarouthakis Professor of Manufacturing Management
Professor of Technology and Operations
Supply chain management, capacity management, value of information, optimal design of production-inventory systems, the interactions of capacity decisions and pricing policies, risk-aversion in operations, response to disruptions, auctions in energy markets, energy storage and curtailment, and financial and operational hedging.

Hyun-Soo Ahn
Michael R. and Mary Kay Hallman Fellow
Professor of Technology and Operations
Director, Master of Supply Chain Management Program
Modeling and analysis of production and service systems; supply chain Management, OM/marketing interface, and revenue management.

Ravi M. Anupindi
David B. Hermelin Professor of Business Administration
Professor of Technology and Operations
Supply chain management, strategic sourcing, sustainability, supply contracts, inventory management, lean operations, operations-marketing interfaces, and healthcare product and service delivery in low- and middle-income countries.

Damian R. Beil
Michael R. and Mary Kay Hallman Fellow
Professor of Technology and Operations
Interim Associate Dean for Graduate Programs
Design of auctions and competitive sourcing mechanisms — supplier qualification, quality, availability and cost risks, and economies of scope; experimental economics and behavioral operations.

Izak Duenyas
Donald C. Cook Professor of Business Administration
Professor of Technology and Operations
Professor of Industrial and Operations Engineering, College of Engineering
Supply chain management and coordination, revenue management in a variety of industries, evaluation of investment decisions in capacity, and modeling and control of production systems.

Wallace (Wally) Hopp
Associate Dean for Learning Design
C. K. Prahalad Distinguished University Professor of Business and Engineering
Professor of Technology and Operations
Professor of Industrial and Operations Engineering, College of Engineering
Design, control, and management of production systems; lean manufacturing; supply chain risk and robustness; workforce management; new product innovation; and health care systems.

Yan Huang
Assistant Professor of Technology and Operations
Crowdsourcing, open innovation, platform economy, social media, data-driven decision-making, economic theories, structural modeling, statistical modeling, and Bayesian econometrics.

Stefanus Jasin
Arnold M. and Linda T. Jacob Faculty Fellow
Assistant Professor of Technology and Operations
Dynamic/real-time/data-driven optimization, online learning and optimization, design and analysis of provably near-optimal heuristic controls. Dynamic pricing and revenue management, supply chain, logistics, omni-channel and e-commerce, optimization in on-demand market, and interface of operations with marketing, information system, and economics.
M. S. Krishnan  
Associate Dean for Global Initiatives and Executive Education  
Accenture Professor of Computer and Information Systems  
Professor of Technology and Operations  
Information technology and business innovation, software quality and business flexibility, business value of IT applications, information infrastructure management and IT strategy.

Stephen (Steve) Leider  
Assistant Professor of Technology and Operations  
Experimental economics, behavioral economics, contract theory, bargaining, social networks, and contracts and relationships in supply chains.

Peter J. Lenk  
Professor of Technology and Operations  
Application of Bayesian models to business and economics, including marketing research, information systems, and finance, Bayesian theory, inference, and computations.

Jun Li  
Assistant Professor of Technology and Operations  
Empirical operations management, business analytics, price and revenue management, consumer behavior, competitive dynamics, network analysis, service sector, and airline and hotel retailing.

William S. Lovejoy  
Raymond T. J. Pennings Family Professor of Business Administration  
Professor of Technology and Operations  
Entrepreneurship, new product development, small-scale sociotechnical design, and healthcare management.

Nigel P. Melville  
Associate Professor of Technology and Operations  
Information systems and organizational performance, information systems innovation, information systems and environmental sustainability.

Samantha Meyer  
Assistant Professor of Technology and Operations  
The overlap between social and resource networks, particularly in the education sector.

Mohamed Mostagir  
Assistant Professor of Technology and Operations  
Economics of operations and technology management, social learning, network economics, stochastic modeling, and dynamic optimization. Application areas: Digital economies, with emphasis on innovation, crowdsourcing, advertising, intellectual property, network formation, and opinion dynamics.

Amitabh Sinha  
Co-Director of the Joel D. Tauber Institute for Global Operations  
Associate Professor of Technology and Operations  
E-commerce (particularly logistics of e-commerce), data science for business, supply chain management, and logistics.

Joline Uichanco  
Assistant Professor of Technology and Operations  
Supply chain management under uncertainty, with a particular focus on supply chain resilience to emergency situations; omni-channel retail operations; and humanitarian logistics.

Andrew (Andy) Wu  
Stein Research Scholar  
Assistant Professor of Technology and Operations and Finance  
Empirical topics in corporate finance and asset pricing, economic networks, machine learning, and financial textual analysis.
