Accounting

Gregory S. Miller // AREA CHAIR

*Ernst & Young Professor of Accounting
Chair of Accounting*

How managers communicate their view of the firm and its activities to outsiders.

Ryan Ball

*Ernst & Young Faculty Fellow
Assistant Professor of Accounting*

The role of low frequency accounting information in high frequency capital markets, mixed data sampling (MIDAS), accrual dynamics, earnings timeliness and forecasting, and the debt contracting value of accounting information.

Anna Costello

*Paton and Drebín Faculty Fellow
Assistant Professor of Accounting*

The role of information in inter-firm relationships, specifically how financial information aids in making trade credit decisions in the supply chain, and the influence of trade relationships on contagion and counterparty risk.

Lindsey Gallo

*Coopers and Lybrand, Norman E. Auerbach
Assistant Professor of Accounting*

The role of disagreement and uncertainty in capital markets, the content of earnings, and the relationship between firm-level and macroeconomic information.

Raffi Indjejikian

*Carleton H. Griffin-Deloitte and Touche LLP Collegiate
Professor of Accounting*

Use of managerial and financial accounting information in performance evaluation and managerial compensation, and agency theory and its application to managerial accounting.

Reuven Lehavy

*Victor L. Bernard-PricewaterhouseCoopers LLP
Collegiate Professor of Accounting
Faculty Director, Paton Accounting Center*

Usefulness of financial analysts' price targets, stock recommendations, and earnings forecasts; firms' use of accounting report discretion (earnings management); and the interaction between analysts' earnings forecasts targets and firms' reporting choices.

Mihir Mehta

Assistant Professor of Accounting

The implications of financial information transfers along supply chains, stakeholders, political economy, corporate behavior, regulation, the consequences of legal and political factors for firms and auditors, and debt contracting.

Venky Nagar

*KPMG Professor of Accounting
Teitelbaum Research Scholar*

Interaction among firm strategy, organizational design and managerial accounting, and use of non-financial measures in performance evaluation.

James Omartian

Assistant Professor of Accounting

The effects of regulation and the role of internal information in firm outcomes and external reporting.

Heidi Packard

Assistant Professor of Accounting

Executive compensation, corporate governance, and disclosure.

Catherine Shakespeare

*Michael and Joan Sakkinen Faculty Fellow
Associate Professor of Accounting*

Financial accounting and reporting, measurement and financial instruments, the timeliness and accuracy of bond ratings, examination of managers' incentives to use discretion in reporting earnings, and evaluation of the role of accounting information in firm valuation.

Christopher Williams

*Associate Professor of Accounting
Michael and Joan Sakkinen Faculty Fellow
Faculty Director Accounting PhD Program*

Understanding the role of accounting information in creating and resolving risk and uncertainty in both capital markets and financial institutions, how discretionary accounting choices made by banks affects both the risk of the individual bank and the bank's contribution to systemic risk.

David W. Wright

Associate Professor of Accounting

Auditing and financial reporting; investigations into the roles of various legal, corporate governance and business relationship characteristics on the quality of financial reporting and auditing; and economic models of auditor and firm behavior.

Gwen Yu

Associate Professor of Accounting

Understanding the role of capital markets, international accounting, corporate disclosure, and real effects of reporting quality.

Business & Economics

Thomas Buchmueller // AREA CHAIR

Waldo O. Hildebrand Professor of Risk Management and Insurance

*Professor of Business Economics and Public Policy
Chair of Business Economics and Public Policy*

Health economics, the demand for insurance, employer-sponsored insurance and the labor market, regulation of insurance markets, and public insurance programs.

Achyuta Adhvaryu

Assistant Professor of Business Economics and Public Policy

Worker productivity and retention in low income countries, firm decision-making and the resulting productivity dynamics in emerging markets, healthcare delivery in low-income contexts, and the long-run economic impacts of early life events and intervention.

Kyle Handley

*Sanford R. Robertson Assistant Professor of Business Administration
Assistant Professor of Business Economics and Public Policy*

International trade and trade policy, investment under uncertainty, firm dynamics, multinational firms, private equity, effects of multilateral and regional trade agreements, and economic geography.

Francine Lafontaine

*Senior Associate Dean for Faculty and Research
William Davidson Professor of Business Economics and Public Policy
Professor of Economics, LSA*

Industrial organization, vertical relationships and antitrust, contracting and franchising, and entrepreneurship. Advances in contract theory and models of vertical relationships applied to the analysis of franchising arrangements and other contractual relationships with an emphasis on incentive issues, firm performance, and competition policy.

Thomas P. Lyon

Dow Professor of Sustainable Science, Technology, and Commerce

*Professor of Business Economics and Public Policy
Professor of Natural Resources and Environment*

Corporate environmental information disclosure, greenwashing, the causes and consequences of renewable energy policy regulation, and voluntary programs for environmental improvement.

Scott E. Masten

Professor of Business Economics and Public Policy

Economics of organization, transaction-cost economics, contracting practices and contract law, theory of the firm, vertical integration and vertical restrictions, and evolution of legal institutions.

Sarah Miller

Assistant Professor of Business Economics and Public Policy

Health economics, public policy, healthcare, public economics, consumer credit, and personal finance.

Nirupama Rao

Assistant Professor of Business Economics and Public Policy

The economic effects of fiscal and regulatory policy, focusing on the impact of taxes and regulations on firm production, investment and pricing decisions and individual consumption behavior.

Jagadeesh Sivadasan

*Associate Professor of Business Economics
Director, Full-Time MBA Program*

Allocative efficiency, firm performance and productivity, international economics, personnel economics, product market competition, and public policy and firm behavior.

Joel Slemrod

*Paul W. McCracken Collegiate Professor of Business Economics
Professor of Economics
Chair, Department of Economics
Faculty Director, Office of Tax Policy Research*

Impact of tax policy on individual and business decisions, compliance costs of taxation, roles of businesses and technology in tax system operation, and tax policy.

Finance

Uday Rajan // AREA CHAIR

*Jack D. Sparks-Whirlpool Corporation
Research Professor of Business Administration
Professor of Finance and Real Estate*

Informational frictions such as adverse selection and moral hazard and their effect on market transactions, with recent work on the role of the board in the presence of activist investors and on the default behavior of subprime mortgages in the years before the financial crisis. Information economics and applications, strategic interactions in markets, market microstructure and limit order markets; corporate finance and credit markets.

Sugato Bhattacharyya

Associate Professor of Finance

The role of corporate finance, information economics and contractual arrangements.

David J. Brophy

*Professor of Finance
Director, Office for the Study of Private Equity Finance*

Venture capital finance and investment, predictive analytics using initial public offering market characteristics and comparison of returns in public and private alternative investment spaces, global flows of public and private capital, and the role of private equity in cross-border direct and portfolio investment.

Matteo Crosignani

Assistant Professor of Finance

Transmission of unconventional monetary policy and regulation on bank credit supply and asset prices. Effect of macro prudential policies on household leverage, house prices, and financial stability.

Robert F. Dittmar

Professor of Finance

Empirical and theoretical issues in asset pricing, in particular the determination of the term structure of interest rates and the cross-section of equity risk premia, also in asset pricing, macroeconomic variables and asset prices, investments, and fixed income securities.

Gautam Kaul

*Fred M. Taylor Professor of Business Administration
Professor of Finance*

Finance and sustainability, asset pricing models, market microstructure, and the behavior of stock and bond prices. Continuing contributions to scholarly research in the field of business, and noteworthy contributions to building and maintaining a strong research environment at Michigan Ross.

E. Han Kim

*Everett E. Berg Professor of Business Administration
Professor of Finance and International Business
Director, Mitsui Life Financial Research Center and East Asia Management Development Center*

Corporate governance and the interplay between the three main governing bodies; the board of directors, the CEO office, labor and finance, law and finance, equity issuance, and employees.

Serhiy Kozak

Assistant Professor of Finance

Empirical and theoretical asset pricing, risk premia across asset classes, fixed income, financial economics, and computational economics.

Indrajit Mitra

Assistant Professor of Finance

Theoretical and empirical topics in finance and macro-economics, analyzing distortions induced by financial frictions, with an interest in effects generated by heterogeneity both on the household and the firm side, and in developing methodologies to solve such models quantitatively, macro-finance and dynamic contracts.

M.P. Narayanan

*Robert Morrison Hoffer Professor of Business Administration
Professor of Finance*

Contract theory, asymmetric information, and their application to corporate finance and investments; capital structure, takeover financing, divestitures, managerial myopia, managerial incentives, corporate governance, mergers and acquisitions, corporate diversification and executive compensation.

Paolo Pasquariello

Professor of Finance

Information economics and its applications to market microstructure (e.g., market liquidity and price efficiency) and international finance (e.g., foreign exchange, financial crises and contagion, and central bank interventions). Strategic trading in stock and bond markets, government intervention in currency and bond markets, financial crises and contagion, financial market dislocations, and the relation between firm-level adverse selection and firms' capital structure decisions.

Amiyatosh Purnanandam

Professor of Finance

Security issuance (IPOs/SEOs) decisions, capital structure and risk-management decisions, banking, corporate risk management and credit risk, initial public offerings and seasoned equity offerings, and theoretical corporate finance. Measurement and monitoring of risk in banks, causes and consequences of financial crisis, incentive issues in mortgage securitization markets, racial differences in real estate finance, and the effect of market pressure on bureaucracies' actions.

Martin C. Schmalz

*NBD Bancorp Assistant Professor of Business Administration
Jones Research Scholar
Assistant Professor of Finance*

Empirical and theoretical topics in industrial organization, corporate finance, behavioral finance, asset pricing, financial economics, industrial organization and entrepreneurship.

H. Nejat (Nejat) Seyhun

*Jerome B. and Eilene M. York Professor
of Business Administration
Professor of Finance*

Backdating of executive options, risk-return trade-off in asset prices, intra-day impact of insider trading, long-run performance of IPOs, managerial overconfidence, Chinese walls and conflicts of interest in securities firms, option pricing, and conflict between information efficiency and rewards to information gathering. Executive compensation, information effects of short-selling, empirical asset pricing, insider trading, law and economics.

Tyler Shumway

*John C. and Sally S. Morley Professor of Finance
Faculty Director, John R. and Georgene M. Tozzi Electronic
Business and Finance Center*

Structure and function of financial markets and the pricing of financial securities, work concerns bankruptcy prediction and the pricing of corporate bonds, the efficient market hypothesis and the intersection of psychology and finance. Market efficiency and behavioral finance, asset pricing theory and models, empirical options pricing, survey measures to explain portfolio choice, econometrics.

Cindy K. Soo

Assistant Professor of Finance

Behavioral finance, real estate finance, financial media, household finance, and applied econometrics.

Toni Whited

*Dale L. Dykema Professor of Business Administration
Professor of Finance*

The effects of financial frictions on corporate investment, econometric solutions for measurement error, corporate cash policy, structural estimation of dynamic models, and corporate diversification.

Stefan Zeume

Assistant Professor of Finance

The impact of anti-bribery regulation on firms competing in regions perceived to be corrupt as well as the impact of exchange of tax information on firms with tax haven subsidiaries, family firms' use of implicit contracts as a substitute for labor market regulation.

Management & Organizations

Susan J. Ashford // AREA CHAIR

*Michael and Susan Jandernoa Professor of Business Administration
Professor of Management and Organizations*

Interests include leadership and managerial effectiveness, issue selling, self-management and organizational change (in the context of interpersonal relations), organizational change, and employee socialization. Leadership processes, proactivity, self-management, issue selling, feedback seeking.

Wayne Baker

*Robert P. Thome Professor of Business Administration
Professor of Management and Organizations
Professor of Sociology, LSA
Professor of Organizational Studies, LSA
Faculty Associate, Institute for Social Research*

Social capital, networks, organizational theory, culture, values, positive organizational scholarship. Economic sociology used to demonstrate that financial markets operate as social networks, and research on American values.

Kim Cameron

*William Russell Kelly Professor of Business Administration
Professor of Management and Organizations*

Virtuousness in and of organizations – such as forgiveness, gratitude, kindness, and compassion – and their relationship to performance. Positive organizational scholarship, downsizing, organizational culture, and developing leadership and management skills.

Charleen Case

Assistant Professor

Social-evolutionary approach to the study of leadership, social hierarchy, and coalitions. The motivational, social-cognitive, and endocrinological processes that underlie the attainment and maintenance of social relationships, with an emphasis on those within group hierarchies and coalitions.

Gerald Davis

*Wilbur K. Pierpont Collegiate Professor of Management
Professor of Management and Organizations
Professor of Sociology, LSA*

Corporate governance, finance and society, and new forms of organizations, corporate governance, organization theory, globalization, social networks, and social movements.

Scott DeRue

*Edward J. Frey Dean of Business
Stephen M. Ross Professor of Business*

Leadership, team and organizational development; individual and organizational learning; strategic execution and implementation; HR/talent strategy; and personal growth and development.

Andrew J. Hoffman

*Holcim (US), Inc. Professor of Sustainable Enterprise
Education Director of the Graham Sustainability Institute
Professor of Management and Organizations
Professor of Natural Resources and Environment*

Institutional theory, culture change, social movements, negotiations, organizational and social entrepreneurship, environmental protection, and sustainability of industries.

Shirli Kopelman

*Faculty Director of Research, Center for Positive Organizations
Professor of Management and Organizations*

Negotiation, leading with emotions, mindfulness, social dilemmas, cooperation. Drawing on personal strengths to be simultaneously collaborative and assertive, lead with emotions, enhance creativity, and align with one's moral compass to achieve goals and maximize economic profits in a sustainable way, while fostering well-being.

Julia Lee

Assistant Professor of Management and Organizations

Relational self-affirmation via social network, implicit beliefs, emotion and emotion regulation, behavioral ethics, lab/field experiments.

David M. Mayer

*Michael R. and Mary Kay Hallman Fellow
Professor of Management and Organizations*

Social and ethical issues in organizations. Behavioral ethics, organizational justice, and workplace diversity.

Jeffrey Sanchez-Burks

Professor of Management and Organizations

Design thinking, innovation, cross-cultural collaborations, emotional aperture, emotional intelligence, and leading organizational change.

Lloyd E. Sandelands

*Professor of Management and Organizations
Professor of Psychology, LSA*

Business ethics, Thomist metaphysics, business applications of Catholic social teaching and the social and spiritual dimensions of life in organizations.

Gretchen Spreitzer

*Keith E. and Valerie J. Alessi Professor
of Business Administration
Professor of Management and Organizations
Director, Center for Positive Organizations*

Thriving at work, leadership and positive organizational scholarship and the role of employee empowerment and leadership development, particularly within a context of organizational change and decline.

Maxim Sytch

*Michael R. and Mary Kay Hallman Fellow
Associate Professor of Management and Organizations*

Organization theory, complex systems, economic sociology, collaboration, conflict, networks, strategic alliances, patent infringement lawsuits, intellectual property, and innovation. Origins and evolutionary dynamics of the dual social structure of markets that encompasses both collaborative and conflictual interorganizational relationships and investigates how network positions of firms determine their behavior and performance.

Jose Uribe

Assistant Professor of Management and Organizations

The impact of network structures and social dynamics on learning and performance in teams and organizations, investigating the demographic determinants of having female top managers in public corporations, the learning networks that enable equity analysts to improve their financial forecasts, and the collaboration networks between players that provide a competitive edge to professional national soccer teams.

James Walsh

*Arthur F. Thurnau Professor
Gerald and Esther Carey Professor
of Business Administration
Professor of Management and Organizations
Professor of Strategy*

Corporation in society, corporate social responsibility and corporate governance; exploring the purpose, accountability, and control of the firm (and even more generally, business itself) in society.

Janet Weiss

*Mary C. Bromage Collegiate Professor
of Business Administration
Professor of Organizational Behavior and Public Policy
Stephen M Ross School of Business
and Professor of Public Policy
Gerald R Ford School of Public Policy*

Public management, public policy, challenges of performance management in government, and the interplay between policy design and the management of public programs. Use of systematic evidence to improve the leadership and effectiveness of public and nonprofit organizations.

Marketing

Fred Feinberg // AREA CHAIR

*Joseph Handleman Professor of Marketing
Professor of Statistics*

Modeling choice behavior; dynamic models of advertising, promotion, and variety-seeking; optimal stopping and cutoffs; decision theory, statistics, and Bayesian econometrics; and the interface between marketing, operations management, and engineering.

Anocha Aribarg

*Michael R. and Mary Kay Hallman Faculty Fellow
Associate Professor of Marketing*

Group decision-making, social influence in choice decisions and impact of social network, Bayesian and econometric modeling of complex consumer choice decisions and consumption experiences, and psychology-based market response modeling.

Richard P. Bagozzi

*Dwight F. Benton Professor of Behavioral Science
in Management
Professor of Marketing*

Emotions, decision-making, theory of mind and social behavior in marketing and organizations; brand communities; health behaviors; cross-cultural research; ethical behavior; neuroscience, genetic, and hormonal aspects of the behavior of consumers and managers; and statistics.

Rajeev Batra

*Sebastian S. Kresge Professor of Marketing
Director of Yaffe Center for Persuasive Communication*

Advertising budgeting and repetition, emotion in advertising, non-verbal processes and effects, brand personality and brand equity, brand building and brand management, global branding issues, global consumer culture and marketing issues in emerging economies, Asian consumers, advertising budgeting and repetition, and marketing communications.

Katherine Burson

Associate Professor of Marketing

Judgement and decision making in consumer behavior, specifically systematic biases in self assessment such as over- and under-estimation of ability and the effects of such biases on product choice.

Aradhna Krishna

Dwight F. Benton Professor of Marketing

Building empirical models to solve strategic business and marketing problems such as resource allocation, launch planning, word-of-mouth marketing and CRM. Marketing and strategy problems in the digital marketing, social media, pharmaceutical, high technology, private equity and gaming industries.

Puneet Manchanda

*Isadore and Leon Winkleman Professor of Retail Marketing
Professor of Marketing*

Big data, response models, resource allocation, advertising, new product adoption, social networks, models of firm behavior, Bayesian econometrics, empirical industrial organization, statistics, and discrete choice models.

Yesim Orhun

Assistant Professor of Marketing

Empirical Industrial Organization: product competition and retail competition. The relationship between market structure, product provision and price discrimination, and the relationship between beliefs and utility.

Venkatram Ramaswamy

*Michael & Mary Hallman Fellow of Electronic Business
Professor of Marketing*

Consumers as co-creators of value, customer-firm interactions, consumer heterogeneity and personalized experiences, market as a forum, experience innovation, experience networks, information infrastructure, consumer-to-consumer interactions, consumer communities, word-of-mouth, and discursive theory of the market.

Scott Rick

Assistant Professor of Marketing

Financial decision making, shopping, intertemporal choice, loss aversion, emotion and decision making, and behavioral economics. The emotional causes and consequences of consumer financial decision-making, with a particular interest in the behavior of tightwads and spendthrifts.

Eric Schwartz

Assistant Professor of Marketing

Interactive marketing, ecommerce, retailing, online advertising, digital media consumption, customer relationship management; Bayesian econometrics and statistics, adaptive experiments, multi-armed bandit problems, machine learning. Customer analytics stretches managerial applications, including online display advertising, email marketing, video consumption, and word-of-mouth.

Srinivasaraghavan Sriram

Associate Professor of Marketing

Product portfolio management: topics such as inferring complementary/substituting relationships between products, cannibalization, consumer adoption of technology products, and strategies for multi-sided platforms. Two-sided markets, product portfolio management, brand equity, consumer adoption of technology products, consumer learning, long-term effects of marketing actions and optimal allocation of marketing budgets.

Shalena Srna

Assistant Professor of Marketing

Judgment and decision making, consumer perceptions, consumer motivation, and performance.

J. Frank Yates

*Professor of Psychology, LSA
Professor of Marketing*

Decision management and aiding; consumer behavior, risk perception, probability judgment processes, accuracy and improvement, cultural variations in judgment and decision behavior, individual differences in decision making, indecision, assessing and explaining decision making skills.

Carolyn Yoon

Professor of Marketing

Consumer neuroscience, decision neuroscience, cultural neuroscience, cognitive aging in consumer contexts, implicit memory for consumer information, and cross-cultural differences in memory and cognition.

Strategy

James Westphal // AREA CHAIR

*Donald C. Cook Professor of Business Administration
Professor of Strategy*

Strategic management and organizational theory, with a focus on social and psychological processes in corporate governance and strategic decision making. Corporate governance and top management, institutional processes, symbolic management and social networks.

Allan Afuah

Professor of Strategy

Business model innovation, crowdsourcing, disruptive technologies, impact of technological discontinuities on ecosystems, multisided platforms, open innovation, problem solving, strategy YOU, technological innovation from the point of view of customers, and value creation and capture during innovation.

Felipe Csaszar

Associate Professor of Strategy

Structure and organization design's effect on strategic-level outcomes such as innovation, speed, and profits. How managers' mental representations and firms' decision-making structures affect firm-level outcomes such as innovation, speed and profits.

Justin Frake

Assistant Professor of Strategy

Organizational authenticity, social status, employee mobility, entrepreneurship, career specialization, innovation, and causal identification.

Cheng Gao

Assistant Professor of Strategy

Strategy in nascent industries, innovation, entrepreneurship, non-market strategy, regulatory uncertainty, organization theory, and emerging markets.

Derek Harmon

Assistant Professor of Strategy

Strategic communication, financial markets, managing relationships with stakeholders, reputation, legitimacy, trust. How the financial markets react to communication from the Chair of the Federal Reserve, company founders during initial public offerings, and CEOs during major organizational events like mergers and acquisitions.

Michael Jensen

Professor of Strategy

The socio-cognitive structures of markets including social networks and market identities and how they affect competition. Status, theorized initially as positions in social structure, but more recently also as an important aspect of market identities, and on developing a role-theoretic perspective on reputation.

Aneel G. Karnani

Professor of Strategy

Competitive advantage, growth strategies, global competition, emerging economies, corporate social responsibility, economic development, and global poverty.

Linda Y.C. Lim

Professor of Strategy

Foreign direct investment, multinational strategies, labor issues and economic development in Asia, evolution of Asian business systems, government-business and state-society relations.

Jordan Siegel

*Michael R. and Mary Kay Hallman Fellow
Associate Professor of Strategy*

How firms can borrow foreign institutions as a means of substituting for weak governance institutions at home, how labor market institutions impact the design and success of global business strategies, and how culture impacts the decision of where to locate foreign direct investments.

Brian Wu

*Associate Professor of Strategy
Director, China Global Node*

Corporate scope, industry dynamics, firm capabilities, entrepreneurship, innovation, Chinese economy, the role of firm capabilities in influencing the dynamics of corporate scope and the evolution of industries.

Yue Maggie Zhou

Professor of Strategy

Theory of the firm, product variety, organization structure, coordination, complexity, multinational corporations. The role of complexity in setting limits to firm growth, competitive strategies, and organizational design.

Technology & Operations

Roman Kapuscinski // AREA CHAIR

*John Psarouthakis Professor of Manufacturing Management
Professor of Technology and Operations*

Supply chain management, capacity management, value of information, optimal design of production-inventory systems, the interactions of capacity decisions and pricing policies, risk-aversion in operations, response to disruptions, auctions in energy markets, energy storage and curtailment, and financial and operational hedging.

Hyun-Soo Ahn

*Michael R. and Mary Kay Hallman Fellow
Professor of Technology and Operations
Director, Master of Supply Chain Management Program*

Modeling and analysis of production and service systems and OM/marketing interface. Mathematical models related to supply chain management, dynamic pricing and revenue management, workforce agility, and resource allocation.

Ravi M. Anupindi

*Colonel William G. and Ann C. Svetlich Professor
of Operations Research and Management
Faculty Director, Center for Value Chain Innovation
Professor of Technology and Operations*

Strategic sourcing, sustainability, supply contracts, inventory management, lean operations, operations-marketing interfaces, healthcare product and service delivery in low and middle income countries. Decision models for commodity operations, supply chain risk management, emerging markets supply chains, resource allocation for malaria interventions, and a study of models of TB treatment and health market innovations.

Damian R. Beil

*Michael R. and Mary Kay Hallman Fellow
Ford Motor Company Co-Director of the Joel D. Tauber
Institute for Global Operations
Professor of Technology and Operations*

Mathematical models to analyze complex problems in sourcing. How bargaining power affects opportunistic pricing by suppliers, how procurement auctions should be designed to account for supplier qualification screening, quality levels, and long-term maintenance of a healthy supplier base, and how feedback affects crowdsourcing outcomes.

Izak Duenyas

*Herrick Professor of Business
Faculty Director, Executive MBA Program
Professor of Technology and Operations
Professor of Industrial and Operations Engineering,
College of Engineering*

Supply chain management and coordination, revenue management in a variety of industries, evaluation of investment decisions in capacity and in modeling and control of production systems.

Wallace Hopp

*Associate Dean for Part-Time MBA
C. K. Prahalad Distinguished University Professor
of Business and Engineering
Professor of Technology and Operations
Professor of Industrial and Operations Engineering,
College of Engineering*

Design, control, and management of operations systems, with emphasis on manufacturing and supply chain systems, innovation processes, and health care systems.

Yan Huang

Assistant Professor of Technology and Operations

How firms can use information technology innovatively in their business processes. The challenges facing practitioners as they leverage crowdsourcing and social media internally and externally to improve productivity and profitability. Open innovation, platform economy, data-driven, decision making economic theories, structural modeling, statistical modeling, Bayesian econometrics.

Stefanus Jasin

*Arnold M. and Linda T. Jacob Faculty Fellow
Associate Professor of Technology and Operations*

Dynamic/real-time/data-driven optimization, online learning and optimization, design and analysis of near-optimal heuristic controls. Dynamic pricing and revenue management, supply chain, logistics, omni-channel and e-commerce, optimization in on-demand markets, and interface of operations with marketing, information system, and economics.

M. S. Krishnan

*Associate Dean for Global Initiatives
and Executive Education
Accenture Professor of Computer and Information Systems
Professor of Technology and Operations*

Information technology and business innovation, software quality and business flexibility, business value of IT applications, information infrastructure management and IT strategy.

Stephen Leider

Associate Professor of Technology and Operations
Experimental, theoretical and empirical methods to answer questions in behavioral economics and behavioral operations management, contract theory, trust and bargaining in supply chain settings and social networks.

Peter J. Lenk

Professor of Technology and Operations
Application of Bayesian models to business and economics, including marketing research, information systems, and finance, Bayesian theory, inference, and computations.

Jun Li

Assistant Professor of Technology and Operations
Empirical operations management, business analytics, price and revenue management, consumer behavior, competitive dynamics, network analysis, service sector, airline, hotel, and retailing.

William S. Lovejoy

*Associate Dean for Specialty Programs
Raymond T. J. Perring Family Professor
of Business Administration
Professor of Technology and Operations
Professor of Art, School of Art and Design*
Entrepreneurship, new product development, small-scale sociotechnical design, healthcare management. Works with companies on new product development, the management of innovation, and process assessment and improvement; and with hospitals and clinics on health care operations.

Samantha Meyer

Assistant Professor of Technology and Operations
The interdependence between social and resource networks, such as how social relationships between people or organizations influence resource acquisition, logistics and strategy, particularly in the education sector. Difficulty of managing operations in organizations and systems with high levels of social complexity, like those found in the education, health care, and public sectors.

Mohamed Mostagir

Assistant Professor of Technology and Operations
Economics of operations and technology management, social learning, network economics, Stochastic modeling, and dynamic optimization. Application areas: Digital economies, with emphasis on innovation, crowdsourcing, advertising, intellectual property, network formation, and opinion dynamics.

Shima Nassiri

Assistant Professor of Technology and Operations
Designing coordination mechanisms in supply chain and its application in healthcare and public health policy using game theory and optimization techniques, and studying the behavioral aspects of healthcare operations using econometrics and data-driven methods.

John Silberholz

Assistant Professor Technology and Operations
Healthcare analytics, with a focus on designing screening strategies for cancer and on the design and analysis of clinical trials for cancer drug therapies.

Joline Uichanco

Assistant Professor of Technology and Operations
Supply chain management under uncertainty, with a particular focus on supply chain resilience to emergency situations; omni-channel retail operations; humanitarian logistics.

Doctoral Studies Program

Stephen M. Ross School of Business

University of Michigan

701 Tappan St.

Ann Arbor, MI 48109-1234

734-764-2343

rossphdprogram@umich.edu

michiganross.umich.edu/programs/phd
