

EXECUTIVE EDUCATION

VALUE-DRIVEN THINKING

Apply marketing and operations strategies to generate value for your organization and customers.

Increase Your Market and Margin to Generate Value

In its simplest form, the value of a product is its perceived quality minus the cost of production and delivery. Value-Driven Thinking explores ways to maximize value by both enhancing the quality of your product and lowering the cost through the use of strategic marketing and operations tools. This course will teach you to think like an executive and generate value by better meeting the needs of your customers and by improving processes within your organization. You will learn strategic marketing methods, work through operational decision-making processes, and learn how to apply these concepts to your own business.

By the end of this course, you will be able to:

- › Identify opportunities for value creation.
- › Develop a systematic plan for testing and improving value creation opportunities.
- › Develop a strategic go-to-market plan for successful value creation.
- › Structure operations to facilitate execution of go-to-market plans.

“ I really like the subject matter in general and the course was laid out in a way that was easy to follow. I really appreciated the videos and the humor. ”

Past Program Participant
